

Abstract:

The NTCC is an organization which is dedicated to the preservation of human health and safety for the betterment of all mankind.

Goals:

1. The NTCC will be establishing an internet portal which will look to stay, if not reverse the effects of the current insanity and falsehoods which are being perpetrated upon humanity over Corona Virus and the poisons which are currently masquerading as helpful vaccines, which they are not.

2. Establish a means and methodology which will allow for people globally to register their healthcare provider, doctor, or nurse or any administrator or healthcare professional, and especially those who have taken or sworn to uphold the Hippocratic Oath, which explicitly states:

"The regime I adopt shall be for the benefit of the patients to the best of my power and judgement, not for their injury or for wrongful purpose. I will not give a deadly drug to anyone though it be asked of me, nor will I lead the way in such counsel...Whatsoever house I enter, i will enter for the benefit of the sick, refraining from all voluntary wrongdoing and corruption ...If I fulfill this oath and confound it not, be it mine to enjoy life and art alike, with good repute among all men for all time to come, but may be contrary befall me if I transgress and violate my oath."

3. Provide advice and written forms which any person or patient may use in their rejection of any kind of experimental treatment or vaccine, which has not been fully tested or approved by the applicable, independent agency or authority and not by a corporate drug interest, who may in fact be selling or dispensing same.

4. Allow for any person, anywhere to register the name of their doctor, healthcare professional or other person who may have coerced or induced a person into a treatment or drug which is not effective or does not conclusively work for the purposes it was represented to remedy.

5. Create a global registry where any person or past patient can register the name of the party, person or healthcare professional who induced them in any treatment which they did not fully agree to or were coerced into taking.

6. Create a registry for the family and friends of those who have indeed taken some bogus or ineffective treatment, which has directly or indirectly contributed to the demise or death of their family members, friends or loved ones.

7. Once a healthcare professional, doctor, administrator or other such person has participated in the coercion or inducement of any person to take any kind of experimental treatment or vaccine, that they become listed in a central database, which will be used for further action, including but not limited to: civil prosecution, criminal prosecution, fines, punitive and otherwise, as allowed for in the rules and regulations that are set out in the Nuremberg Trials and the subsequent resultant codes of 1947 and 1948.

8. Once any person is so listed in the NTCC database, they will be notified as such, and will be further advised that they have fallen under the jurisdiction of the ICC in the Hague and will be allowed a proper defense for the charges and their prosecution by the NTCC. Any such person receiving such notice, will be required to post a bond with the ICC for said defense. If the person refuses or fails to respond, default judgment will be sought against them and all matters of fines, default judgment, civil or criminal liabilities will be collected by the ICC or its designated agent, as would be determined by the Court.

9. Persons who have lost a family member or provider for their family, may also bring suit for civil prosecution against any person who may or becomes so listed in the NTCC database, or who has been so accused, as it would relate to the death or dismemberment - of any kind, due to the recommendations or advice which said person had provided to someone that was previously in their care.

10. Force all those who are being misled, ill-advised or ill-informed to take responsibility for the harm which they are perpetuating upon innocent people and to either fully stop, or to be held fully accountable for their actions, period.

11. To reactivate the Nuremberg trials in May of 2022, for all prosecutions and modern trials to begin.
